

Dear friends!

Together with a small team of energy workers I have finally been able to design a highly vibrational light grid mandala for use in case of radioactive radiation.

I share this picture with people all over the world for free use. There is NO copyright.

Everybody can and should pass it on, mail is forward, and share it via social networks such as facebook, twitter etc. around the globe. Those who have sufficient language skills can help and translate this into any language they know. Thank you.

Nobody is to make money from it, it's intended for helping in a responsible way and to do so quickly and efficiently.

The light grid method is a great and relatively new way for using energy frequencies for a positive influence and harmonization in humans, animals and plants, in water...

Everyone can and should print it out and laminate it (or protect it in some other way)

ATTENTION: The pattern was developed by a specific calculation method, so it is effective in the original version only.

Only a printout of the original has the effect of a full energy field, so do not copy, but always re-print!

The mandala must face the body! or plants, food, water jar etc.

It is very important to use the mandala close to the body, in order for the water in the body cells to be "informed".

The larger the pattern, the greater the energy field.

I attach the mandala in different sizes, there are also small versions in the size of business cards that can be cut out and put in a pocket and the like. For the version in the jpg file it's possible to add the explanatory text in any language, thanks for any help.

Therefore I turn to therapists and doctors, energy workers and light workers, to all who think and act responsibly:

Let us pray for divine help, so that we may succeed, together, in supporting many people and protecting them from pain and suffering.

I would ask you all to help and to help quickly! Distribute this mail.

May it be for the benefit of all.

And may humanity begin to rethink it's ways of treating mother earth and change to more gentle ways.

Ricky Eichinger, Austria
